## Seminar

### From definitions to projections A journey through the activities of Eurostat in demographic and migration statistics

The presentation is addressed to those interested in international population statistics and namely to users of Eurostat demographic and migration data, with the goal of explaining the work setting of Eurostat in this domain, raising awareness of the challenges that must be dealt with to produce statistical information on population, and to inform about the latest developments.

### Giampaolo Lanzieri

**Giampaolo Lanzieri is Senior Expert at Eurostat, the Statistical Office of the European Union**, where he is leading the team responsible for demographic and migration statistics as well as population projections. He holds a Master in Statistics and Economics, a PhD in Statistics and a Specialization in Social Research. Dr Lanzieri has contributed in several UN Task Forces to various international recommendations related to statistics, such as population censuses, vital events, population projections, and circular migration.

**Monday 11<sup>th</sup> June | 12:30**  
**Seminar room n. 36 | Building D1 - 3rd Floor**  
**Lungo Dora Siena 100/A, Turin**
